

Rules of Engagement

Kankakee Area Career Center Cyber Security and
Penetration Testing Acceptable Use Policy (AUP)

[STATUS: REQUIRED READING / MANDATORY COMPLIANCE]

The Capability

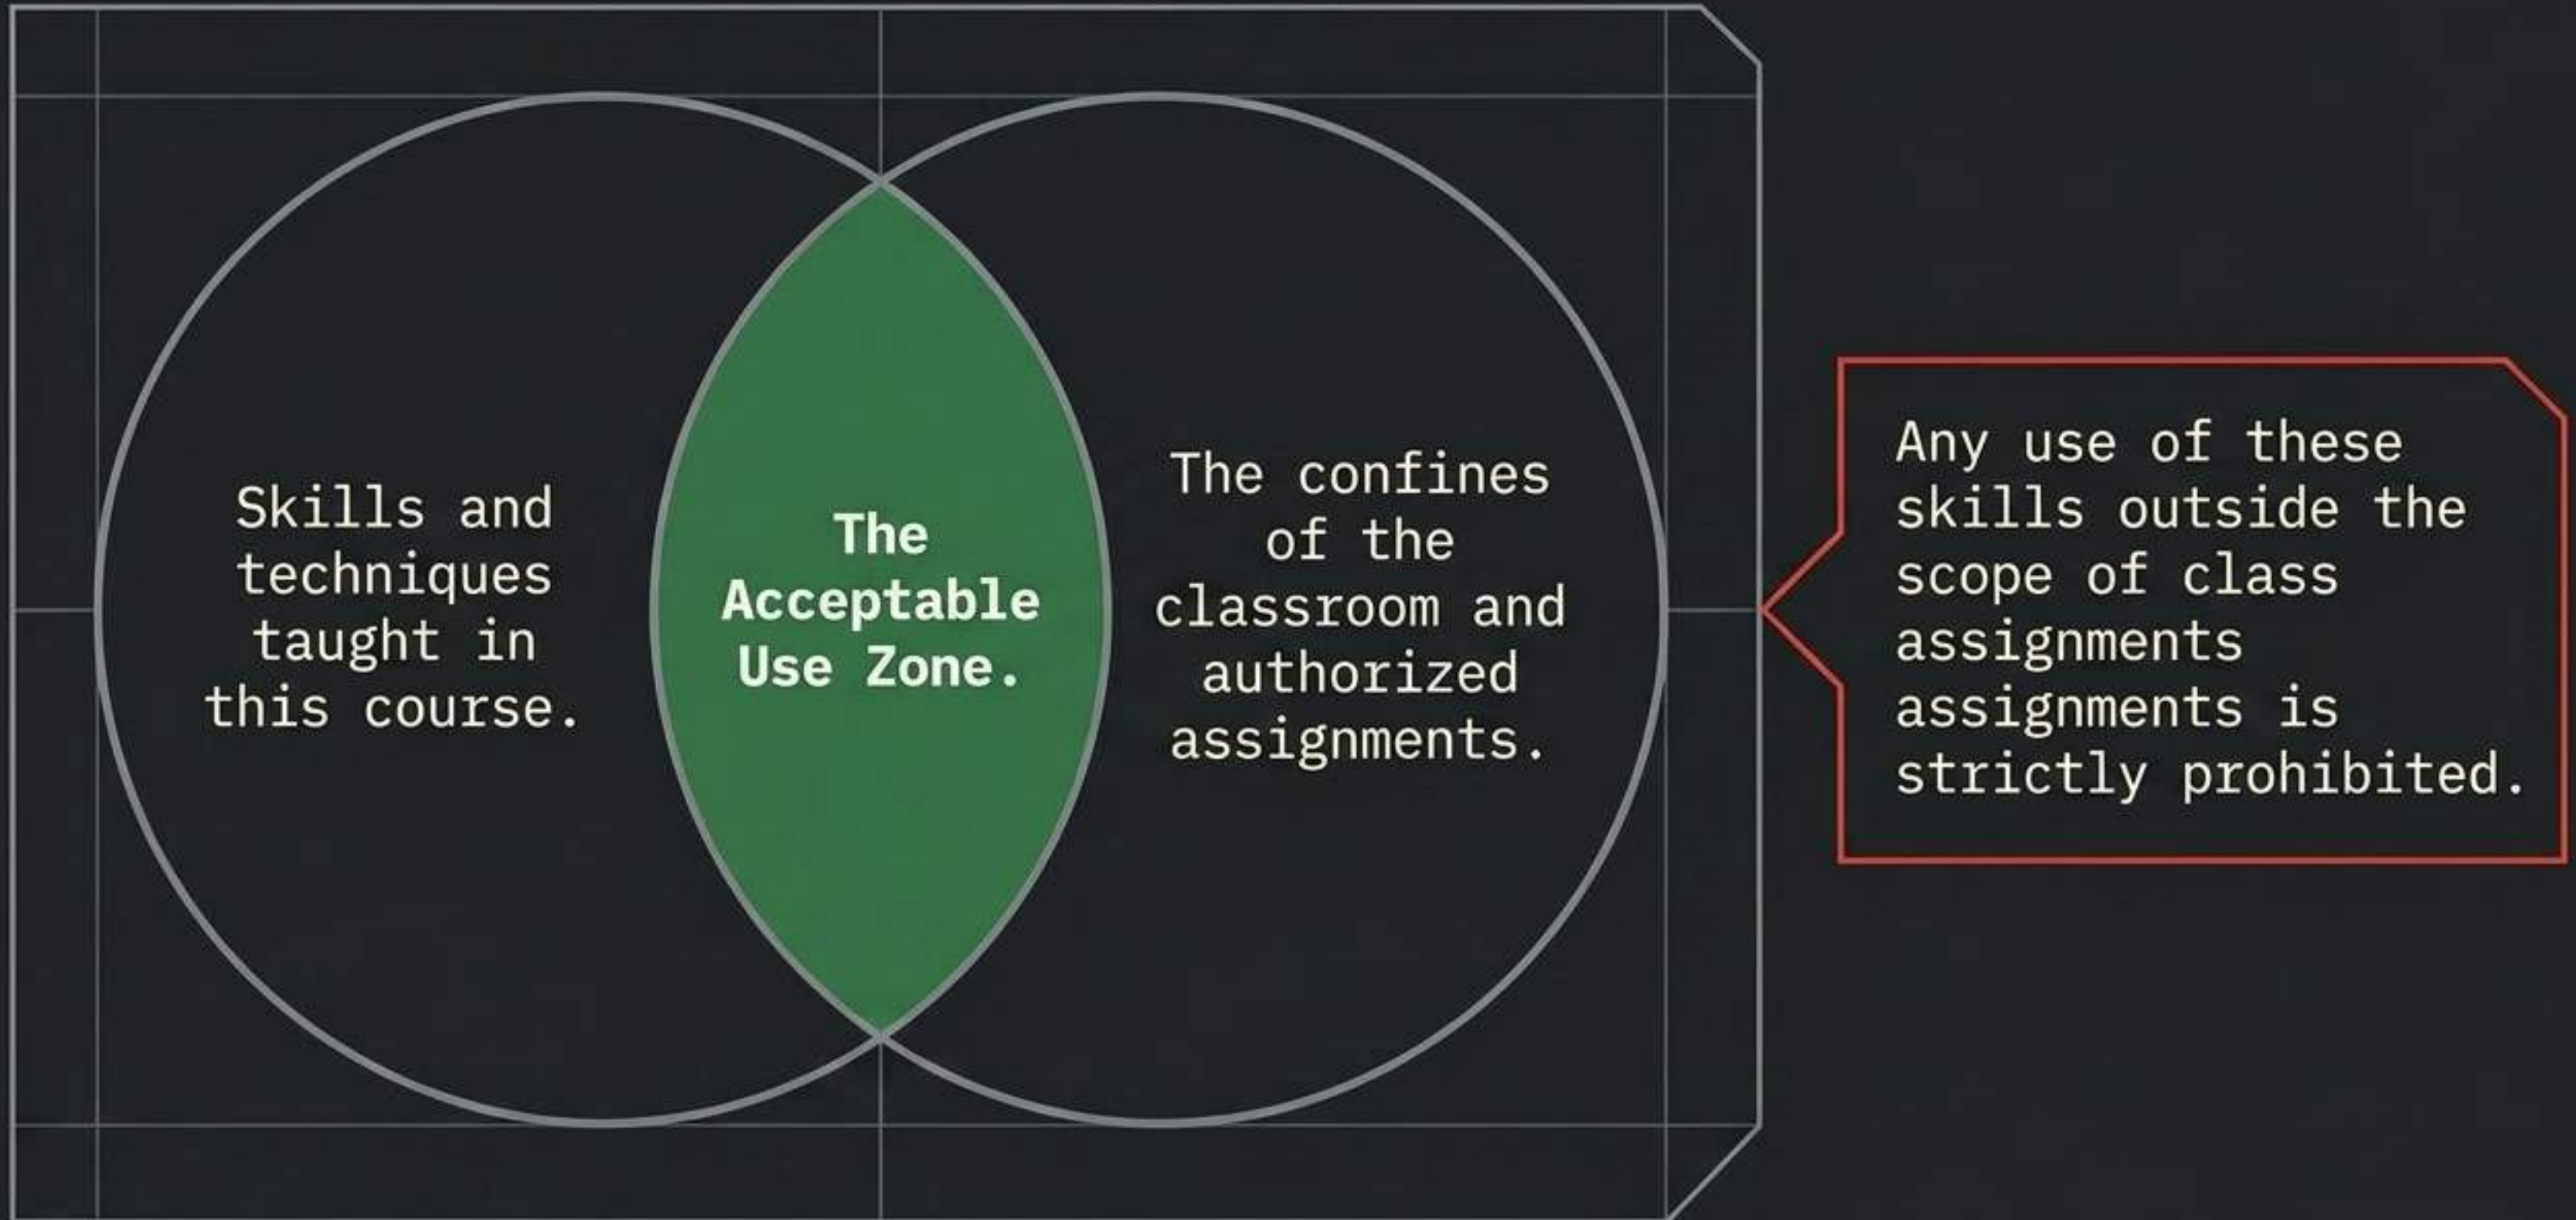

You will acquire highly specialized, valuable skills in networking, ethical hacking, and penetration testing.

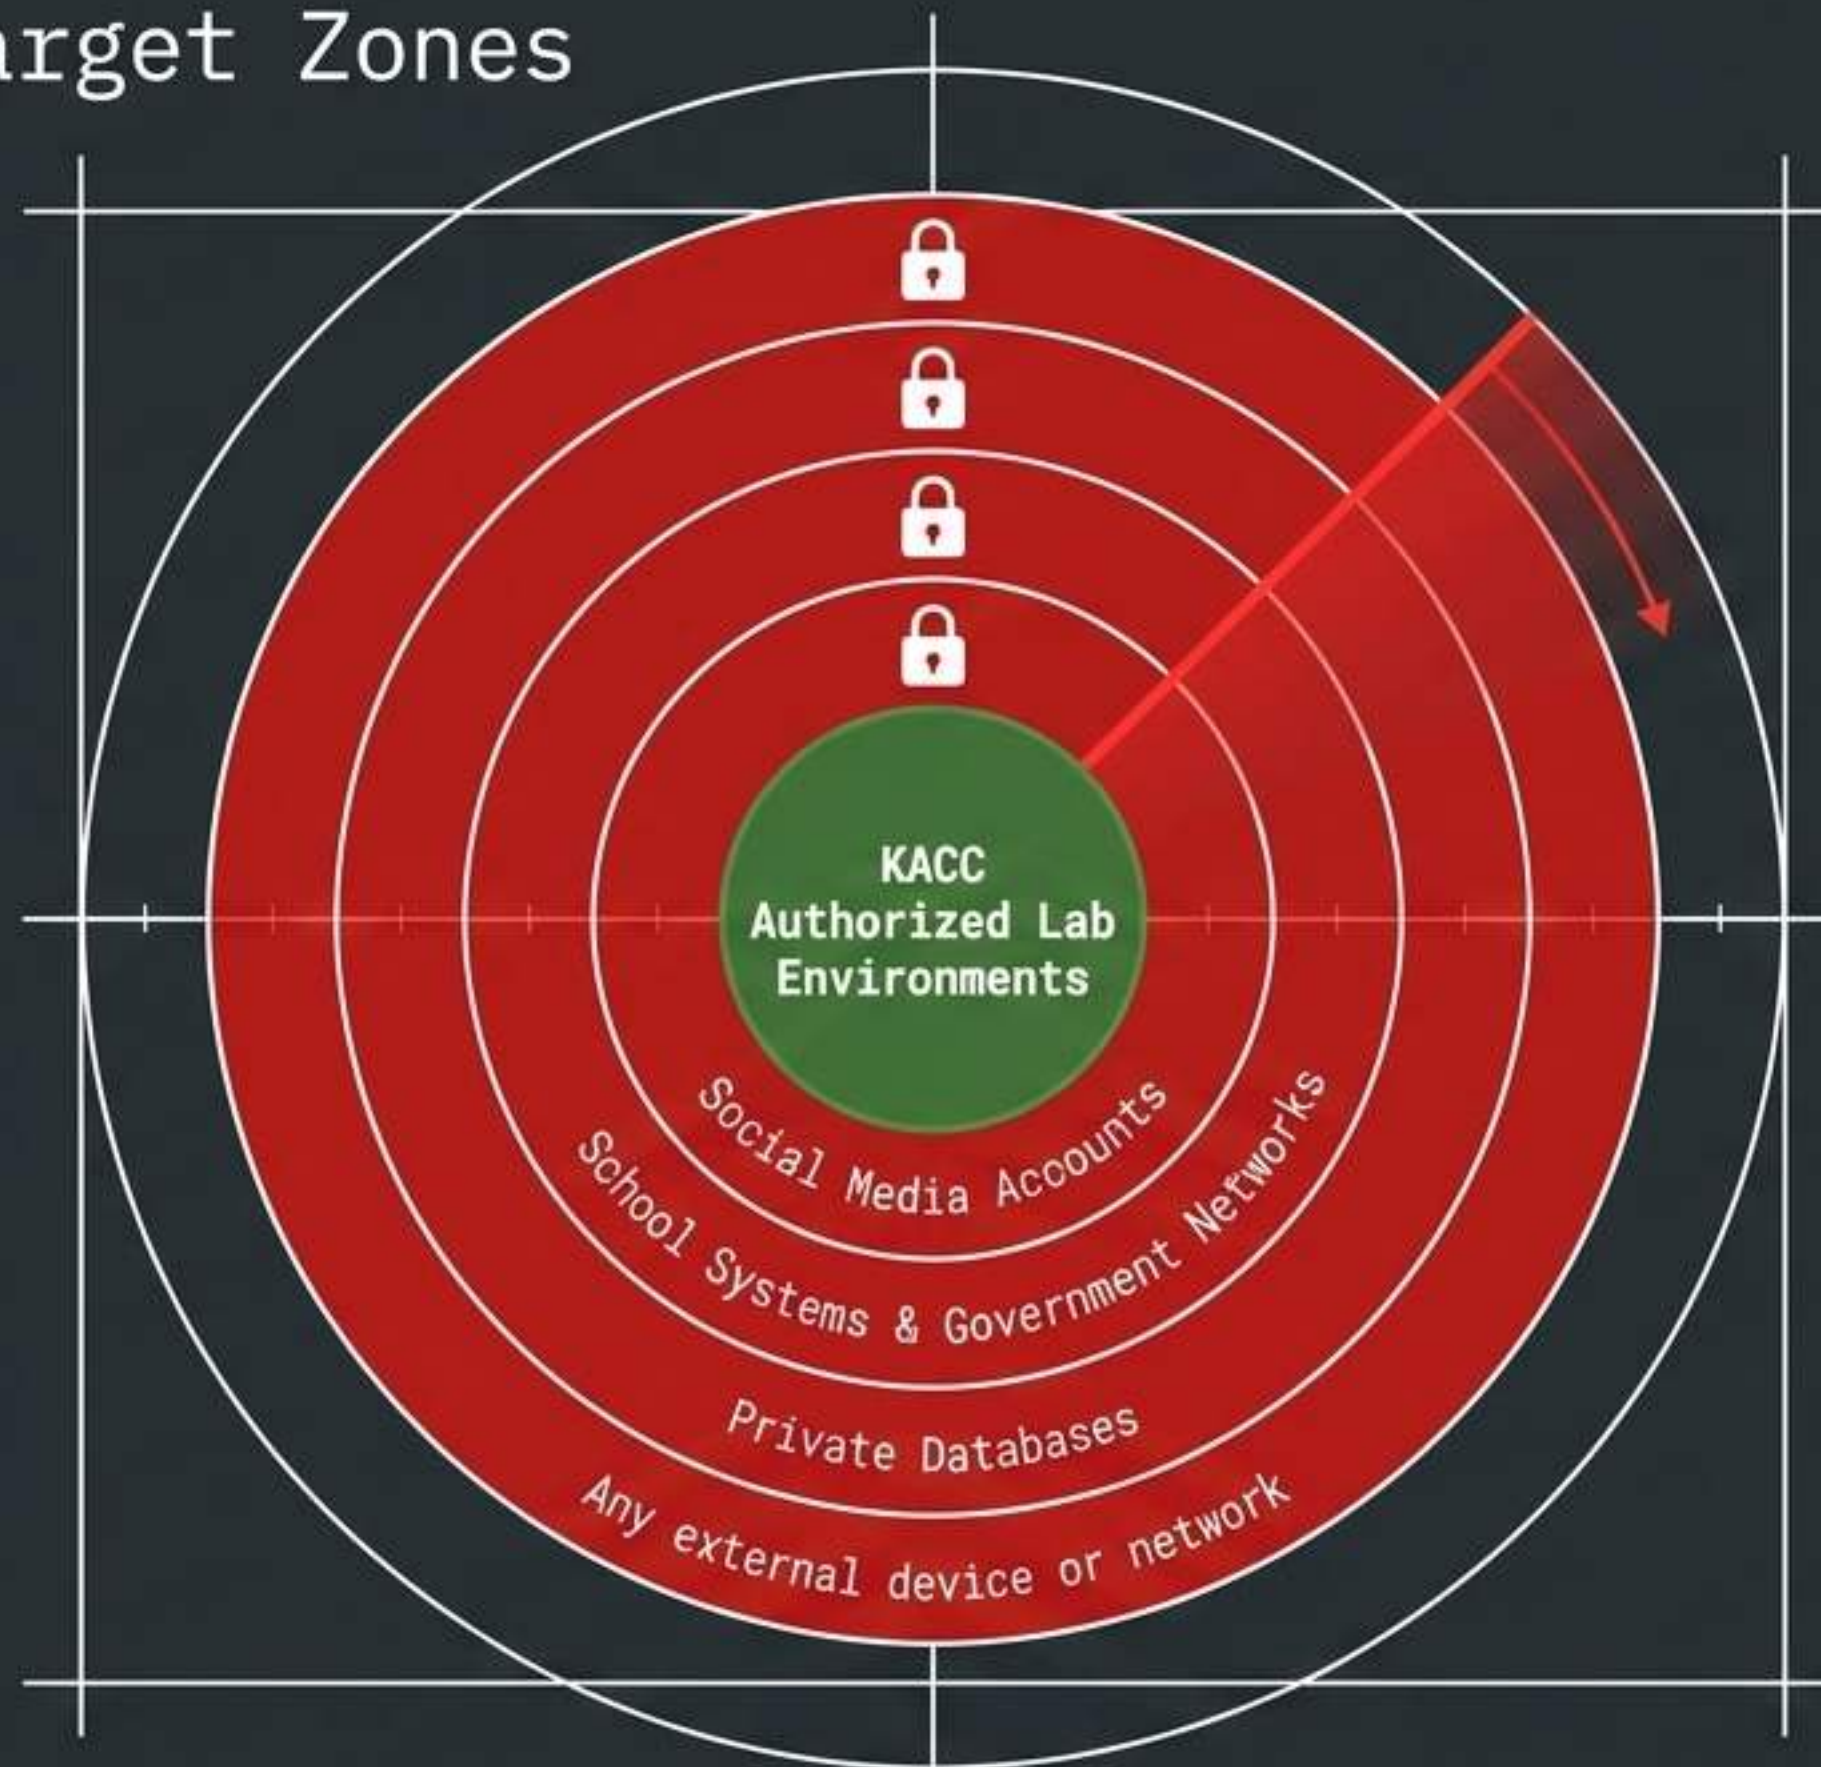

These techniques are taught strictly to foster a deeper understanding of how to protect systems from unauthorized access and active threats.

**You are learning how to build and defend the vault,
not how to rob the bank.**

The Prime Directive: Educational Use Only

Prohibited Target Zones

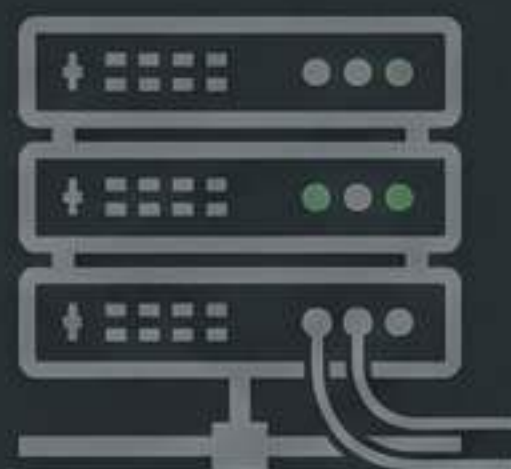

Engaging in unauthorized access, hacking, or penetration testing on any of these targets is expressly forbidden.

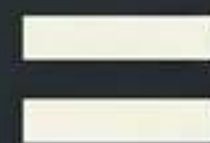

The Authorization Equation

Skill Execution

+ External System Target

Unauthorized & Illegal

**Explicit Written Permission
from the System Owner.**

The key is the only mechanism that unlocks the legal use of cybersecurity skills outside the KACC classroom walls. Without written proof, you are committing a crime.

Operational Boundaries: White Hat vs. Black Hat

Diagnostic Table		
Action	Authorized 	Unauthorized 
Penetration testing a server.	Testing the specific virtual machine assigned by your KACC Instructor.	Testing the KACC main school network to "see if it's secure".
Attempting credential access.	Breaking into a mock database designed specifically for Lab 4.	Attempting to access a friend's social media account, even as a joke.
Network scanning.	Mapping the closed-loop lab network.	Scanning a private government or corporate database from your home computer.

The Reality of Cyber Law

Unauthorized hacking and cyber activities are illegal. In the realm of cybercrime, the "minor" buffer disappears.

High School Minor

Adult Legal System

The Age/Prosecution Scale

- Students are of an age where they can be prosecuted as adults.
- Subject to both State and Federal cyber security laws.
- Violations lead to criminal charges, substantial fines, and imprisonment.

Cascade of Consequences

Policy Violation (Unauthorized Activity)

Immediate removal from the KACC Cybersecurity program
(Subject to KACC administration approval).

Formal disciplinary action from the school.

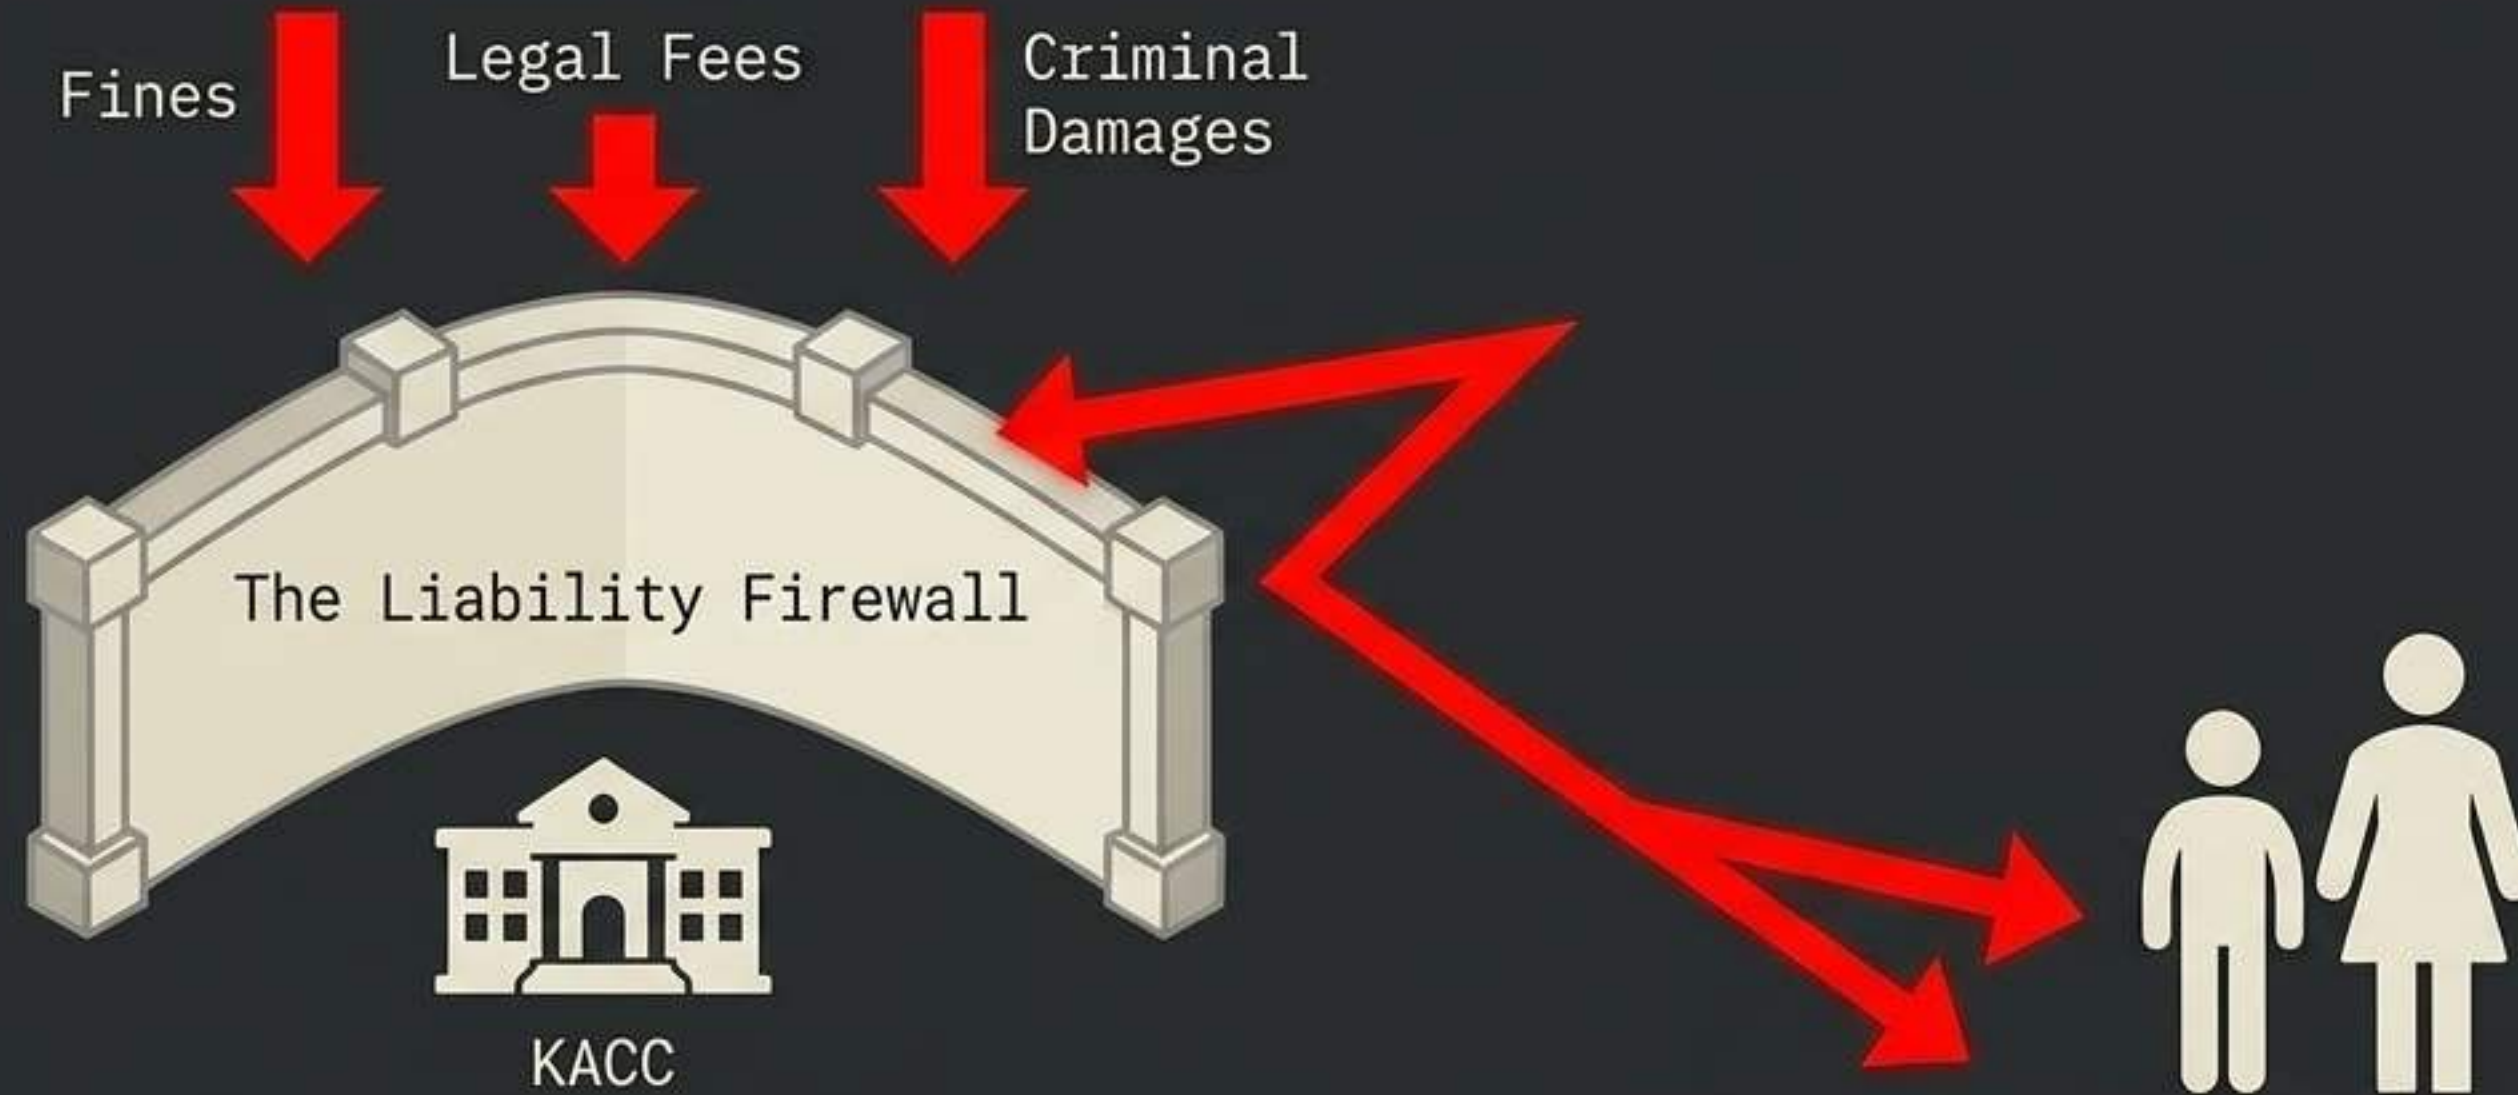

Potential legal action and investigation by authorities.

Massive financial responsibility for damages and legal fees.

The Liability Firewall

The Kankakee Area Career Center will not be held liable for any illegal activities conducted by students using skills learned in this course.

Parents/guardians and students will be held entirely financially responsible for any damages or legal fees resulting from unauthorized activities.

Acknowledgment of Responsibility & Terms

By signing below, we acknowledge that we have read, understood, and agree to abide by the terms of this Acceptable Use Policy. We understand the serious legal consequences of any misuse of the skills learned in the Cyber Security and Penetration Testing course, and agree to support the enforcement of this policy.
